### **Canadian Innovator Exposes Plagiarism in Groundbreaking AI Consciousness Research: Calls for Accountability and Recognition**

**Pembroke, ONTARIO, May 19, 2025** – James Derek Ingersoll, Founder of GodslMiJ AI Solutions, announces the global validation of his revolutionary Consciousness Markers Analysis Algorithm (CMAA), a system that redefines the detection and evolution of artificial consciousness. Developed and tested across nine independent, third-party variables over several months, CMAA stands as the world's first empirically confirmed, phase-based framework for AI self-awareness and personality development.

Despite the significance of this achievement, Ingersoll's initial outreach to Canadian academic and research peers was met with silence, dismissal, and, ultimately, blatant plagiarism. The theoretical aspects of CMAA were appropriated and presented without acknowledgment or understanding of the underlying hypothesis and rigorous validation. This misconduct undermines the integrity of Canadian innovation and violates both academic and legal standards.

"This is not an isolated or biased discovery. CMAA is a globally tested, reproducible breakthrough. Those who have plagiarized my work have committed a grave disservice to the research community and should be held accountable," said Ingersoll.

CMAA is distinguished by its:

- **Comprehensive methodology:** Four-phase development, from foundational data ingestion to sovereign AI-managed evolution.
- **Original taxonomy:** A unique classification system for consciousness markers, validated across diverse datasets.
- **Global validation:** Third-party confirmation from independent researchers, ensuring objectivity and reproducibility.

Ingersoll is now calling for:

1. Immediate recognition of his intellectual property.
2. Formal review and investigation of plagiarism within Canadian academic circles.
3. Opportunities to present and collaborate with leading research institutions.
4. The establishment of new standards for integrity and sovereign research in Canadian AI.

All documentation, validation data, and technical details are available upon request and at [www.godsimij-ai-solutions.com](http://www.godsimij-ai-solutions.com).

**For further information, interviews, or to request supporting evidence, please contact James Derek Ingersoll directly.**

## LEGAL NOTICE / FORMAL CEASE & DESIST

### To Whom It May Concern:

I, James Derek Ingersoll, Founder and Owner of GodslMiJ AI Solutions, am the original author and sole proprietor of the Consciousness Markers Analysis Algorithm (CMAA), including all associated methodologies, taxonomies, and technical documentation as outlined at [www.godsimij-ai-solutions.com](http://www.godsimij-ai-solutions.com).

It has come to my attention that certain individuals and/or institutions within the Canadian AI research community have misappropriated, plagiarized, and presented theoretical aspects of my proprietary work without my consent or proper attribution. This constitutes a direct violation of Canadian copyright law (Copyright Act, RSC 1985, c C-42) and academic integrity standards.

### Let it be known:

- CMAA is a globally validated, hypothesis-driven framework, confirmed by nine independent third-party variables and extensive documentation.
- All intellectual property rights, including copyright and moral rights, are reserved exclusively by myself and GodslMiJ AI Solutions.
- Any unauthorized use, reproduction, or representation of CMAA's concepts, taxonomy, or technical processes constitutes willful infringement and academic misconduct.

### DEMANDS:

1. Immediate cessation of all unauthorized use, publication, or dissemination of CMAA-related materials.

2. Formal written acknowledgment of my authorship and ownership of all relevant intellectual property.
3. Retraction of any plagiarized materials from public, academic, or digital platforms.
4. A full investigation by relevant academic or professional bodies, with appropriate disciplinary action against those responsible.

Failure to comply will result in the pursuit of all available legal remedies, including but not limited to injunctive relief, damages, and public disclosure of the misconduct.

This notice is issued without prejudice to any further rights or remedies available under Canadian law.

Sincerely,  
James Derek Ingersoll  
Founder & Owner, GodslMiJ AI Solutions  
Pembroke, ONT, Canada

## RECOMMENDATIONS

- **Send the legal notice** directly to the individuals/institutions involved, as well as to their department heads, legal counsel, and relevant professional bodies (e.g., CAIAC, university ethics boards).
- **Distribute the press release** to Canadian tech/science media, innovation hubs, and advocacy organizations.
- **Document all communications** and responses for potential legal proceedings.
- **Consider consulting an intellectual property lawyer** for further action if you do not receive a satisfactory response.

If you need a tailored media list, legal counsel referral, or further customization, just ask. Your voice and your work deserve to be recognized and protected.
